

**CORSA PERFORMANCE EXHAUSTS SHOWCASED  
AT AUSTRALIAN AUTO AFTERMARKET EXPO**

BEREA, Ohio – Distributors looking to carry a premium line of performance exhaust systems can learn about CORSA Performance Exhausts during the Australian Auto Aftermarket Expo (AAAE) May 12-14, 2011 in Melbourne, Australia.

CORSA Performance Exhausts, a division of TMG Performance Products, will have information available for attendees in the U.S. Commercial Service Booth E2-C. As an internationally sold brand, CORSA manufactures high-quality stainless steel exhaust systems in the United States for today's most popular cars and trucks, including the Cadillac CTS-V, Chevrolet Corvette and Camaro, Dodge Challenger, Ford Mustang and Jeep Wrangler.

The company's unique advantage is its patented Reflective Sound Cancellation™ (RSC™) technology, which acoustically tunes each CORSA Performance Exhaust system for a custom sound that delivers a powerful note outside the vehicle with a guaranteed drone-free interior cabin. Each exhaust system is made handcrafted with a non-restrictive design for improved horsepower and torque. The exhaust systems are finished with double wall, highly polished stainless steel tips laser etched with the CORSA logo.

CORSA offers a Limited Lifetime Warranty that protects the exhaust for the entire life of the vehicle. For more information, call 800.486.0999 or visit [www.corsaperformance.com](http://www.corsaperformance.com).
