

THE SMARTEST BATTERY CHARGERS IN THE WORLD

MEDIA RELEASE

May 2011

CTEK launches the MXS 5.0 – a new frontier in consumer battery charging

A 5A consumer battery charger that incorporates technology previously only found in CTEK's professional product line

As technology in our cars, bikes and other automotive equipment become more sophisticated, CTEK, a leading global brand in the care and maintenance of batteries, has continued to boost its consumer range of products by incorporating state-of-the-art technology from its professional product range into the new **CTEK MXS 5.0**.

A compact charger that packs a punch, the CTEK MXS 5.0 sports features such as a display showing users the entire charging process, a battery diagnosis function that indicates if the battery is able to receive and retain a charge, and a special reconditioning function that restores stratified and deeply discharged batteries.

There is also an important function to tackle the tougher demands associated with charging in a battery in colder temperatures and the demands associated with effective charging of AGM batteries. This type of battery, such as Optima, is often found in sport and high-performance vehicles.

CTEK CEO, Jarl Uggla, said, "The CTEK MXS 5.0 has been developed with the consumer specifically in mind. Users can now enjoy a compact and affordable charger with all the features and technology of a professional product. This technology has been proven as a top performer in rough and demanding workshop environments which makes it the perfect product for anyone, regardless whether they are a moderate or intensive user."

Making the charger even more versatile is the selectable 0.8A or 5A charging choices for 12V batteries. This makes it possible to charge smaller batteries, such as motorcycle, scooter and jet-ski batteries, both effectively and gently.

Additionally, being equipped with 5A of electric charge means that the charger has more power and reduces the time it takes to charge a battery.

The extra amperage also enables the CTEK MXS 5.0 to charge larger batteries, jumping from 90 Ah to 110 Ah for regular charging and from 140 Ah to 160 Ah for maintenance charging.

THE SMARTEST BATTERY CHARGERS IN THE WORLD

The charger is water resistant, spark-proof, reverse-polarity protected and comes with a five-year warranty.

About CTEK

CTEK was founded less than 10 years ago and is the leading global developer of intelligent lead acid battery chargers.

A sister company to Creator Teknisk Utveckling AB, a leading research, design and product development consultancy, CTEK was established to design, manufacture and supply and new system of battery chargers that would meet the requirements of new generation batteries.

CTEK is a world leading authority on battery technology, battery chargers and battery care and has built a reputation for being first to market with new products.

CTEK chargers use patented technology to ensure that chargers charge, condition and maintain all types of 12V and 24V batteries quickly, simply and safely.

CTEK chargers have been voted best in independent tests every year since 2004.

CTEK products are widely available throughout Australia and New Zealand through Ashdown Ingram, Bainbridge and a variety of retailers.

CTEK supplies chargers to some of the world's most recognised manufacturers e.g. Alfa Romeo, Audi, Bentley, BMW, Corvette, Ferrari, Lamborghini, Lexus, Maserati, Mercedes, Porsche, Rolls Royce, Scania and Yamaha.
