

THE SMARTEST BATTERY CHARGERS IN THE WORLD

MEDIA RELEASE

May 2011

CTEK launches the new CTEK MXTS 70 – The ultimate workshop charger

CTEK, a leading global brand in the care and maintenance of batteries, has launched the **CTEK MXTS 70**, the latest addition to its professional range of battery chargers designed specifically for workshop users.

The CTEK MXTS 70 has been developed with the ability to fast and effectively charge both 12V and 24V lead-acid batteries with sophisticated, state of the art technology.

As CTEK's most powerful battery charger, the CTEK MXTS 70 provides professional users with the ability to swiftly undertake battery maintenance and charging services on the most demanding of batteries.

The charger is equipped with selectable modes for optimal battery size adaptation as well as selectable power supply program for constant voltage output of 13.6 V (max 70 A) or 27.2 V (max 35 A), making it an essential tool for professional users.

CTEK CEO, Jarl Ugglå, said, "Battery problems are often one of the most common auto concerns that see automotive vehicles being sent into the workshop. With the CTEK MXTS 70, professional users can undertake professional battery charging and maintenance much quicker and easier."

Featuring a unique display that clearly shows the user the charging status, charge voltage, current, charge time and energy indication for battery condition control, the CTEK MXTS 70 gives the user more control over the charging process, allowing the user to easily track the battery charging process and charge rate at a particular point in time.

The CTEK MXTS 70 has a reconditioning function that effectively restores stratified and deeply discharged batteries, ensuring a longer battery life and restored capacity.

Additionally, the patented desulphation mode in the CTEK MXTS 70 removes harmful lead-sulphate crystals from the lead plates before commencing its charging cycle to ensure the battery remains in optimum condition.

The charger is housed in heavy duty aluminum housing for rough environments and is designed to withstand rugged professional use.

THE SMARTEST BATTERY CHARGERS IN THE WORLD

The CTEK MXTS 70 uses CTEK's unique eight-step charging approach to battery care, ensuring optimum charge levels and that vehicles are able to start first time.

The charger is fully automatic, spark-proof, reverse-polarity protected and comes with a two-year warranty.

About CTEK

CTEK was founded less than 10 years ago and is the leading global developer of intelligent lead acid battery chargers.

A sister company to Creator Teknisk Utveckling AB, a leading research, design and product development consultancy, CTEK was established to design, manufacture and supply and new system of battery chargers that would meet the requirements of new generation batteries.

CTEK is a world leading authority on battery technology, battery chargers and battery care and has built a reputation for being first to market with new products.

CTEK chargers use patented technology to ensure that chargers charge, condition and maintain all types of 12V and 24V batteries quickly, simply and safely.

CTEK chargers have been voted best in independent tests every year since 2004.

CTEK products are widely available throughout Australia and New Zealand through Ashdown Ingram, Bainbridge and a variety of retailers.

CTEK supplies chargers to some of the world's most recognised manufacturers e.g. Alfa Romeo, Audi, Bentley, BMW, Corvette, Ferrari, Lamborghini, Lexus, Maserati, Mercedes, Porsche, Rolls Royce, Scania and Yamaha
